## COMPANY PROFILE

DNS Medikal.shpk was founded on March 23, 2009 as a private company with limited liability and carries out its activity in the field of medical equipment. It is licensed by the National Registration Center with the object of activity: wholesale and retail trade, import export of medical devices, accessories, spare parts, service, testing and maintenance of medical devices. DNS Medikal aims to offer high quality medical equipment on the medical market in Albania at reasonable prices, as well as service and maintenance for medical equipment at the highest contemporary levels.

DNS Medikal is currently one of the leading importers of medical equipment in Albania and our company is expanding its activity and presence throughout Albania. As a subsidiary of the prestigious German company BM Medizintechnik, the DNS Medikal company applies German experience to the medical equipment market following international standards.

The DNS Medikal company includes on it's staff Doctors and Biomedical Engineers with international experience and training at prestigious companies in the medical market, bringing to the Albanian market of technical support, maximum performance in installation, testing, calibration, service and maintenance of medical devices.

We currently offer a wide range of medical equipment such as: Diagnostic Ultrasound Equipment, (ECHO), Radiology Equipment, X-ray, CT Scanners, MRI, CR, Laboratory Equipment, Patient Monitoring & Resuscitation Equipment, Gynecology Equipment, as well as a wide range of consumables for radiology. We are aware that the growth and improvement of our performance, comes through the increase in the quality of services and competitive prices of the products we offer in the market. We have distributed products and equipment and provided services to most directorates of the primary public health service in Albania, as well as to regional hospital directorates of other levels.

In the private market which is also very important, we register more than 200 clients (Mainly private clinics) which grow up on average 10-15% every year.

The vision of the DNS Medikal company is to maintain a predominant position in the medical equipment market in Albania, aiming for maximum performance in the technical support of our customers, who are undoubtedly the assets of our company.
